# 1. Introduction

The *Budget Formulation and Program Analysis Division, Office of the Chief Financial Office*, publishes on the web, a series of NWS budget execution reports.

Collectively, they are called *The Monthly Variance Reports*. Each month, six sets of reports are published on the web. These reports are:

- Labor Costs, Actual vs. Budget Summary
- Non-Labor and PCS Comparison
- Monthly Labor Projections
- Labor Costs, Actual vs. Budget Object Class Detail
- Status of Funds
- Financial Statements NWS

In addition to the reports, *The Monthly Variance Reports* on the web affords the users the interactive ability to add comments and/or explanations for the observed variances. Additionally, the users can add year-end projections as variances from the NWS Annual plan.

This guide describes how to access, print, add explanatory comments, and add year end projections to *The Monthly Variance Reports*, describes the report content and how to interpret them, explains the data sources and data selection rules used in generating these reports, and definitions.

## 2. Accessing, printing, adding explanatory comments, and adding projections to The Monthly Variance Reports

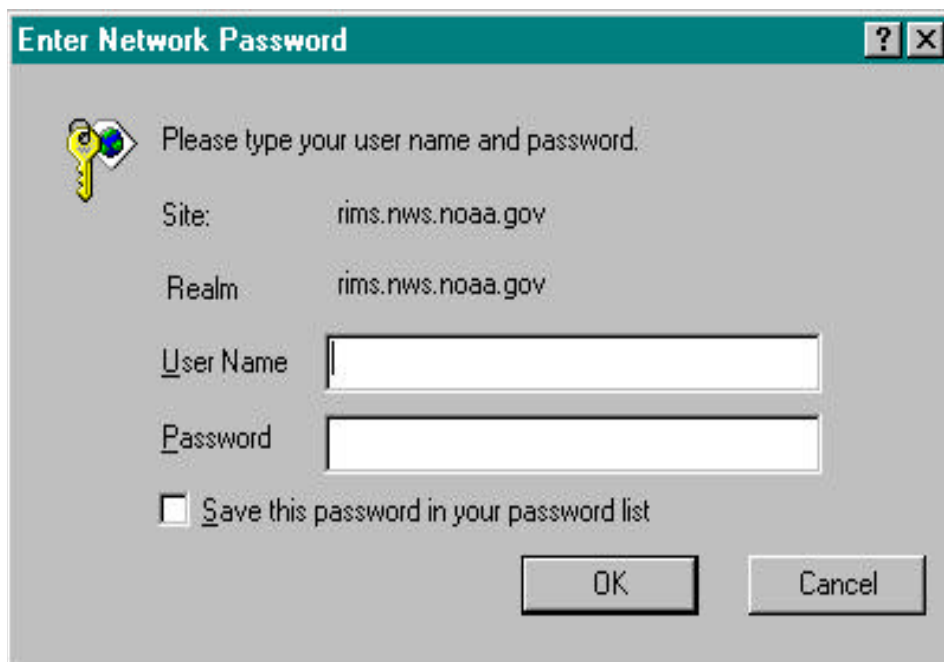

### Accessing the Monthly Variance Reports

To access The Monthly Variance Reports, the user must have access to the Internet using a web browser. The browser must be either Microsoft Internet Explorer 4.0 or Netscape 4.6 or higher. The screen resolution should be set to 1024 by 768 for optimal viewing. Access to the reports are restricted to NWS users who have registered a valid IP address and user name with the *Budget Formulation and Program Analysis Division, Office of the Chief Financial Office*. The user will be supplied a password upon registration.

After starting a web session, the user enters the following URL address:

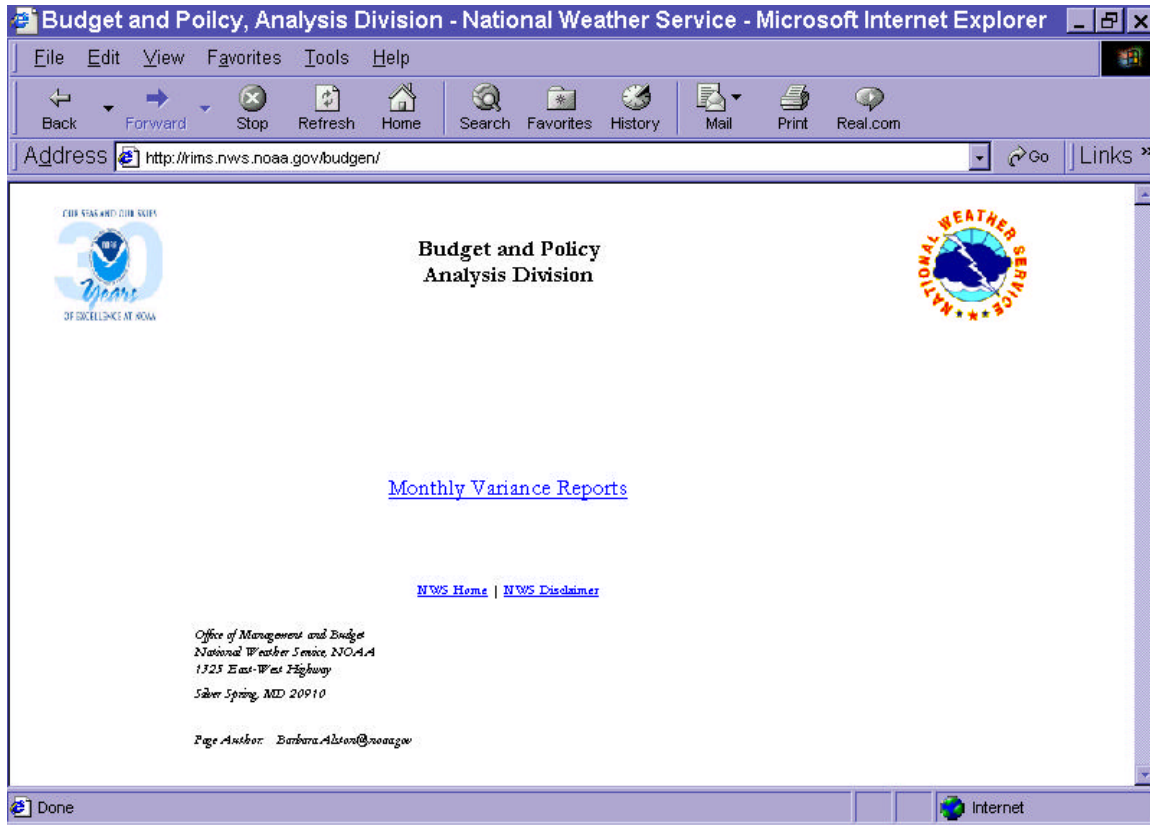

<http://rims.nws.noaa.gov/BUDGEN/>

Upon entry, the user will be prompted for a user name and password.

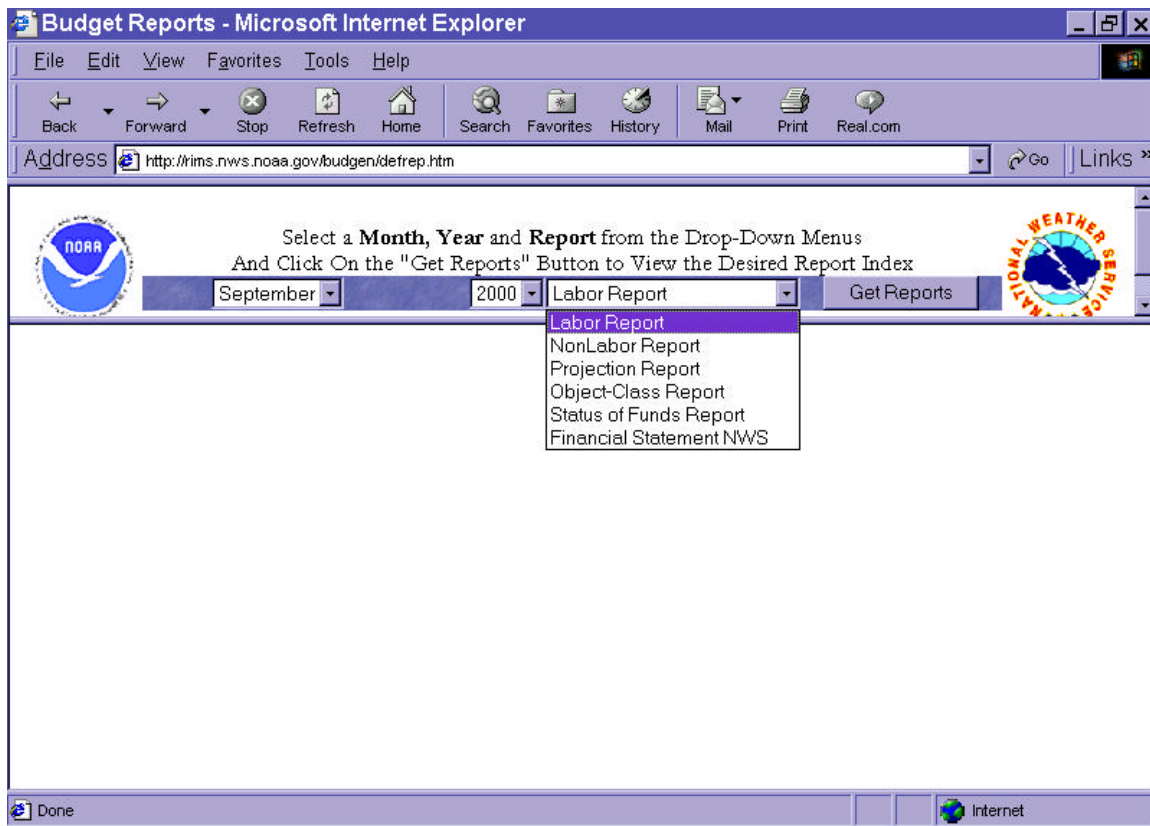

The image shows a Windows-style dialog box titled "Enter Network Password". It has a teal header bar with a question mark icon and a close button (X). The main area is light gray. On the left, there is a yellow key icon. To the right of the icon, the text reads "Please type your user name and password." Below this, there are two labels: "Site:" and "Realm:", both followed by the text "rims.nws.noaa.gov". Under "Site:", there is a small globe icon. Below these labels are two text input fields: "User Name" and "Password". At the bottom left, there is a checkbox labeled "Save this password in your password list". At the bottom right, there are two buttons: "OK" and "Cancel".

After user name and password verification, the user will see a page titled *Budget Formulation and Program Analysis Division*.

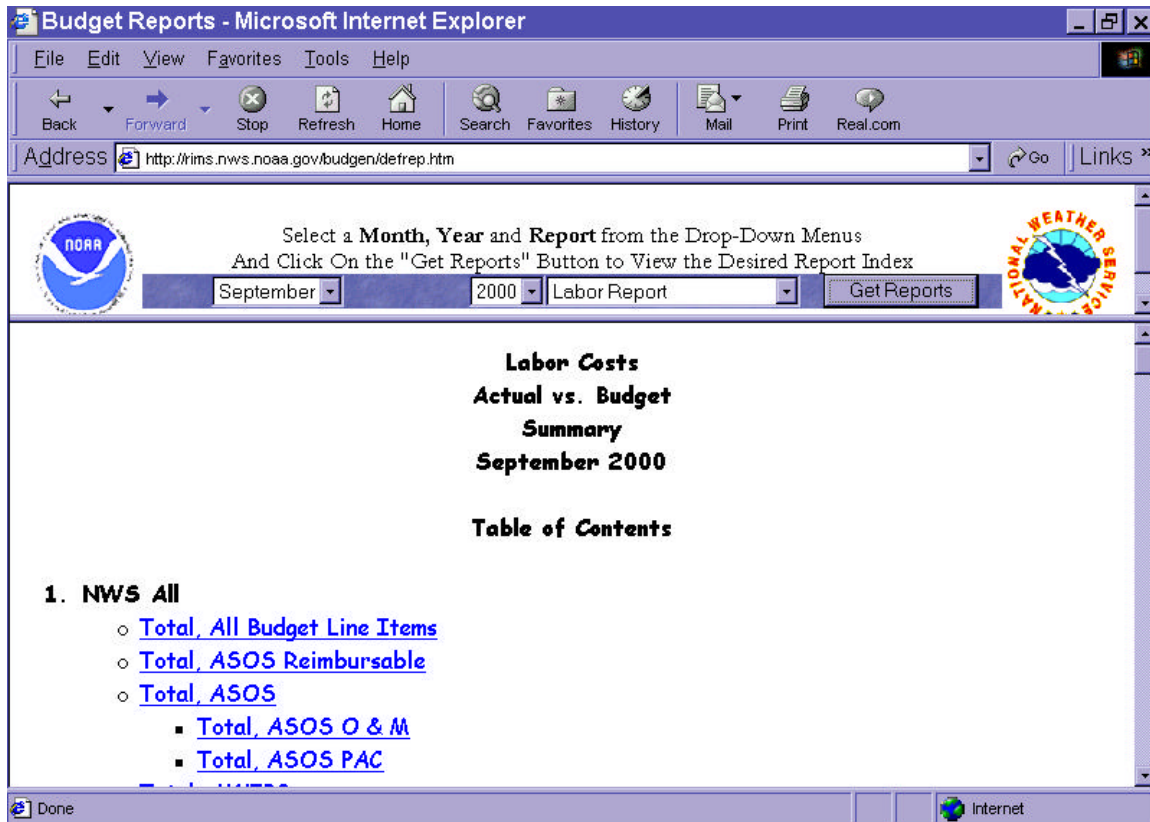

Click on *Monthly Variance Reports* to enter the report menu.

Select the **Month**, **Year** and **Report** using each field's drop-down menu and click on the *Get Reports* Button to view the desired report's Table of Contents.

The Table of Contents is made up of hyperlinks to the various reporting levels. FMC's are restricted to the NWS All and their respective FMC reports, determined at the time of registration.

### Printing the Monthly Variance Reports

Upon viewing an individual report, the user can print the report by using the web browser's Print icon found on the web browser menu bar.

To print the entire set of reports for your FMC, do the following:

- From Table of Contents, click on your FMC's name. This will bring up another window showing all the reports for the FMC in tile layout.
  - *For Internet Explorer:*
    - From the menu bar, select FILE, and then PRINT
    - In the dialog box that appears, in the "Print Frames" section, select "All frames individually" and then press OK.
  - *For Netscape:*
    - Click on the frame (page) to be printed and then the Print button.
- In both browsers, hit the close button on the frame of the window when done.

#### Adding Comments the Monthly Variance Reports

The users have the capability to enter Comments for the variances in the reports for any Pay Responsibility for an office. This capability is not available in the All Budget Line Items reports. (For NCEP, it is not available by Center; it is available only for each of the Pay Responsibility total reports.) To access the data entry dialog window, click on any YTD Variance in a report.

The window will repeat the line of data, showing the OBJECT CLASS, INIT PLAN, NWS PLAN, ACTUAL, and VARIANCE. Below that is a non-editable text box that shows the COMMENT HISTORY. This displays all comments that you have made; so, if you work on the variance more than one time, the history of each of those comments appears.

Variance Comment Entry Screen - Microsoft Internet Explorer

Object Class: TOTAL FTES

Init Plan:

NWS Plan:

Actual: .00

Variance: .00

Comment History:

New Comments:

SUBMIT EDIT LAST COMMENT CANCEL

Below the COMMENT HI STORY is the NEW COMMENTS text box where you type your comment, which will apply to this month's report. If you want to reuse a comment from a previous month, the normal Windows cut and paste will allow you to move comments.

After entering the comment, clicking on the:

- SUBMIT button will save your comment
- EDIT LAST COMMENT button will allow you to make changes to the last comment from the COMMENT HI STORY window above
- CANCEL button will close the Comment Window without saving any entered comment data

After the due date for all input, the *Budget Formulation and Program Analysis Division* will print a Comments report for the CFO. The reports will summarize the input, but only shows the last comment made for a particular variance.

If the user wants a printout of the comments, click on the Pay Responsibility and another window will come up filled with all of the current comments for all lines on the displayed report. Click on the browser Print button to print.

### Adding Projections to the Monthly Variance Reports

Projections can be entered from both the *Non-Labor and PCS Comparison Report* or the *Labor Costs, Actual vs. Budget Summary Report*. The three links to the projection data entry dialog window in the *Non-Labor and PCS Comparison Report*; they are the Total Non-Labor, Total PCS and Total Prior Years Obligations labels. The one link to the projection data entry dialog window in the *Labor Costs, Actual vs. Budget Summary Report* is the Total Labor label. All of these labels will be blue and the status bar will display "Click on Mouse to Enter End of Year Projection" when the mouse cursor hovers over any of these labels.

It does not matter which Total line is clicked because the exact same window and record is brought up by any of the four choices.

The window has: four entry prompts for Labor, Non Labor, PCS and Prior Year, and one non-editable prompt Total; and one entry prompt for Assumptions. When the window comes up, it will display what the user has entered as projections for that month. If you want to reuse a projection from a previous month, the normal Windows cut and paste will allow you to move projections.

Projections should be entered as a variance from the annual plan in thousands of dollars. For example, to make a projection of an overage of \$120,700.00, the user would enter 120.7 at the appropriate prompt; where as underage (having a balance) by \$120,700.00, one would enter -120.7 at the appropriate prompt. Thus, projected variances are displayed using the same convention as FIMA does for over/under variances.

Assumptions should be entered when any of the projected variances would benefit from clarification. The assumptions may include explanations about why a particular variance will occur; e.g., a contract was delayed, an unexpected expenditure appeared in FI MA, a correction will be made, etc.

Projection Input Screen - Microsoft Internet Explorer

EOY projected Variance and Assumption's

Labor:  +

Non Labor:  +

PCS:  +

Prior Year:  +

Total:  +

Assumptions:

\*Figures are in thousands of dollars

Submit Cancel Run Report

After entering the projection and any pertinent assumptions/explanations:

Clicking the SUBMIT button will SAVE the projection and clicking the CANCEL button will close the Projection Window without saving any entered projection data. The RUN REPORT button creates a report of all entered projections for your FMC. Will print all projected Pay Responsibilities entered.

After the due date for all input, Budget Formulation and Program Analysis Division will produce a report for the CFO that summarizes the input, and the Status of Funds Report will be republished, so as to include the projections.

### 3. Report Description

#### Labor Costs, Actual vs. Budget Summary

The Labor Costs, Actual vs. Budget Summary report provides a summary of NWS labor costs, at the NWS Total (national) level and at the FMC level. The total of all FMC summaries will equal the NWS Total. The NWS Total or FMC level labor costs are summarized by pay responsibilities (see Appendix A for list of Task Codes that are included in a Pay Responsibility and Task Code to Pay Responsibility lookup table). Where appropriate, pay responsibilities are further broken down into O&M, PPA, or PAC summaries.

Labor Costs are adjusted for PCS costs, for Object Classes 12xx. PCS plans are not identifiable in FI MA plans so object class 12xx might contain the benefits portion of the FMC's PCS's plans. However PCS actuals can be identified in the FI MA Transitions file and they are excluded in this report. See the description for the *Non-Labor and PCS Comparison Report*.

Each Labor Costs, Actual vs. Budget Summary report follows the following layout.

#### *Title*

The Title contains the fiscal year, the report title, the Total or FMC summary level, and the Pay Responsibility summary level.

#### *Month*

#### *Year to Date through Month*

The month displayed is the current reporting calendar month. The values under the Month column are the current monthly labor values. The values under the Year to Date through Month are the year to date cumulative labor values through the current reporting Month.

#### *Total Employees*

The Planned Total Employees is count of all positions in RI MS

The Actual Total Employees is obtained from the Human Resources Data System (HRDS). The count is for all Pay Plans. The count is based on the last complete pay period for the reporting month, as received by HRDS.

The reporting pay period is listed in the Assumptions found at the bottom of each report.

### *Total FTE*

Total planned and actual FTE data are obtained from the FI MA Master file, for Object Classes 111x except for 1118 (lump sum terminal leave), 113x, 1160, 1161, 1180, and 1182. The data is received as FTE hours, for the current reporting month and cumulative year to date through the reporting month. FTE's are calculated by dividing the total hours by 2,080.

### *Average Grade/Step*

The Average Grade and Step are obtained from HRDS data for the last complete pay period of the month (org code, pay plan, grade, step). They are calculated as follow:

- Only GM and GS are used to calculate average grade/step
- All GMs have step 0 in HRDS and are assumed to be step 10
- Some GSs have step 0 and are left as step 0
- Grades within an FMC are summed and divided by the number of GM and GS positions in the FMC to get the average grade
- Steps within an FMC are summed and divided by the number of GM and GS positions in the FMC to get the average step

### *Salaries*

Planned and actual Salaries data are obtained from the FI MA Master file, for Object Classes 1112, 1113 1118, 1130, 1132, 1133, and 1135.

### *Benefits*

Planned and actual Benefits data are obtained from the FI MA Master file, for Object Classes 1218, 1219, 1230, 1231, 1232, 1233, 1234, 1235, 1236, 1237, 1238, 1239, 1320, 1321, 1330, and 1399.

### *COLA*

Planned and actual COLA data are obtained from the FI MA Master file, for Object Class 1213.

### *Total Benefits*

Planned and actual Total Benefits are the sum of Benefit and COLA.

### *Overtime*

Planned and actual Overtime data are obtained from the FI MA Master file, for Object Class 1151.

### *Premium Pay*

Planned and actual Premium Pay data are obtained from the FIMA REVTSK and the FIMA Master files, respectively, for Object Classes 1152, 1154, 1156, 1157 and 1158.

### *Awards*

Planned and actual Awards data are obtained from the FIMA REVTSK and the FIMA Master files respectively, for Object Class 1159.

### *Total Other Comp*

Planned and actual Total Labor is the sum of Overtime, Premium, and Awards.

### *Total Labor*

Planned and actual Total Comps are the sum of Salaries, total Benefits, and Total Other Comps.

The Init Plan Costs are obtained from RIMS. The NWS Plan and the NWS Annual Plan are obtained from the FIMA Monthly Program Review file (REVTSK). The Variance is the result of Actual minus the NWS Plan.

### Non-Labor and PCS Comparison Report

This report provides the Major Object Class Detail for Non-Labor and PCS costs, and the Prior Year Obligations.

The Non-Labor Actual Costs are obtained from the FIMA Master file, for Major Object Classes 21, 22, 23, 24, 25, 26, 31, 32, 41, 42, 43, and 95. Non-Labor Costs are adjusted for PCS Costs for Object Classes 12xx. PCS plans are not identifiable in FIMA plans so object class 12xx might contain the benefits portion of the FMC's PCS's plans. However PCS actuals can be identified in the FIMA Transitions file and they are excluded in this report. The Init Plan Costs are obtained from RIMS. The NWS Plan is obtained from the FIMA Monthly Program Review file (REVTSK). The Variance is the result of Actual minus the NWS Plan.

PCS Costs are obtained from the FIMA Transaction file (FxxTRN where xx denotes the fiscal year). PCS Costs are identified as Document Type 26, with Major Object Classes 12, 21, 22, 25, and 43. Labor Costs and Non-Labor Costs are adjusted for PCS Costs by backing out the PCS Costs by Object Class from Labor Costs and Non-Labor Costs, respectively. For example, let's assume FIMA Master reports that FMC X has a Base Labor Cost in Task Code 9WGM00 for Object Class 1214 (Real Estate Expense); and FIMA Trans reports that FMC X has a Document Type 26 Base Labor

Cost in Task Code 9WGM00 for Object Class 1214 (Real Estate Expense). In this example, the Document Type 26 Trans cost is subtracted from the Master cost, thereby adjusting the Labor Cost, since 1214 is a Labor Object Class for PCS Costs. The Init Plan Costs are obtained from the RIMS Budget Formulation Model. There is no NWS Plan for PCS since it can not be identified separately in FIMA. The Variance is the result of Actual minus the NWS Plan, even though there is no NWS Plan for PCS.

Prior Year Obligations are obtained from Prior Year file (FY\_FMC). Only Actuals are reported. Init Plan or NWS Plan available data are not available.

### Monthly Labor Projections

The *Monthly Labor Projection Report* uses the same labor items as reported in the *Labor Costs, Actual vs. Budget Summary* report, with the exception of the *Total Employees, Total FTEs, and Average Grade/Step*. There are no meaningful projections for these labor items.

The Labor item projections are calculated in one of two methods, depending on the Labor item. One method is based on the reporting month's "burn rate." This method applies to Salaries, Benefits and COLAs. The second method is based on the YTD "burn rate" through the end of the reporting month. This method applies to FTEs, Leave Surcharge (Object Class 1160), Overtime, Premium Pay, and Awards. Note that Leave Surcharge is part of Salaries, and its Cost is removed from Salary Costs before Salaries are projected with the first method. After both Salaries and Leave Surcharge are projected in their proper methods, the two projections are added together and reported as Salary Projection. The Variance is the difference between Annual NWS Plan and the September Projection.

The Overtime, Premium Pay, and Awards projections are furthered adjusted with a monthly adjustment. Pay period data from the NFC lags by about two weeks. Accruals are added in FIMA per the policy found in NOAA Financial Handbook Chapter 3, Section 9, pages 9 – 12, dated 2/1/94. The accrual was designed for "typical" labor; i.e., shift differentials are included but overtime and awards are not. The accrual appears in the unpaid expenditures in FIMA Master file. Each month the previous month's accrual is removed from the unpaid expenditures and the actual pay period data is added to the paid expenditures. At the same time the new accrual for the current month is added to the unpaid expenditures. There is no accrual for the following object classes: 1118, 1134, 1135, 1136, 1138, 1151, 1155, 1157, 1159, 1180, 1182, 1184, 1320, 1321, 1399, 2518, nor for task 9WLV73. The adjustment on

the projection is to compensate for object classes the FI MA does not accrue.

#### Labor Costs, Actual vs. Budget Object Class Detail

*The Labor Costs, Actual vs. Budget Object Class Detail Report* is the same as the *Labor Costs, Actual vs. Budget Summary Report*, except the labor items are reported in their component Object Classes. Also, *Total Employees*, and *Average Grade/Step* are not reported since there are no Object Class details available.

This report is useful for tracing Labor Costs by Object Class and understanding the components that make up a Labor Cost item.

The Labor FTE and Labor Costs are obtained from FI MA Master file. The Init Plan Costs are obtained from RIMS Budget Formulation Model. The NWS Plan is obtained from the FI MA Monthly Program Review file (REVTSK). The Variance is the result of Actual minus the NWS Plan.

#### Status of Funds

The monthly *Status of Fund Report* provides a summary view of the *Labor Costs, Actual vs. Budget Summary Report* and the *Non-Labor and PCS Comparison Report*. It uses the same data sources as these reports. The report presents, by Pay Responsibilities, the summary of Total FTE, and Labor, Non-Labor, PCS and Prior Year Obligations Costs for each NWS FMC.

The Annual Projection column reports Annual Projections as a variance from the NWS Annual plan, as entered by the user in the *Non-Labor and PCS Comparison Report* or the *Labor Costs, Actual vs. Budget Summary Report*. This report is the only one, which displays a plan for PCSs. The Annual NWS Plan equals the FMC's PCS allocation. The monthly NWS Plan is created by assuming an equal distribution over 12 months. Then based on input from each FMC concerning how much of their PCS allocation was planned in object class 12 (labor) versus other non-labor object classes, the NWS Plan is adjusted. The Annual PCS amount planned in labor is subtracted from the Annual NWS Plan as shown on the Labor Cost report and the Annual PCS amount planned in non-labor is subtracted from the Annual NWS Plan shown on the Non-Labor report.

See Section 2 for a description on how the projections are entered.

The projections are recorded as follows:

- When a Labor projection has been entered through the *Labor Costs, Actual vs. Budget Summary Report*:

- Add the Labor projection to the FMC's Labor row in the NWS Plan YTD column and NWS Annual Plan column
- Subtract the projection from the FMC's Labor row in the NWS Plan YTD column and NWS Annual Plan column
- When a Non-Labor projection has been entered through the *Non-Labor and PCS Comparison Report*:
  - Add the projection to the FMC's corresponding Non-Labor row in the NWS Plan YTD column and NWS Annual Plan column
  - Subtract the projection from the FMC's corresponding Non-Labor row in the NWS Plan YTD column and NWS Annual Plan column

### Financial Statements NWS

The monthly *Financial Statement Report* provides a summary view of Plan vs Actual structured like the NWS Appropriation. It uses the same data sources as the *Labor Costs, Actual vs. Budget Summary Report* and the *Non-Labor and PCS Comparison Report*. The report presents two views, with each view a transpose of the other. One view presents the Financial Statements as plans and actuals for a FMC for each Appropriation Category. The second view presents the Financial Statements as plans and actuals for an Appropriation Category by each FMC. The Appropriation Categories are based on the way in which NWS receives its budget. In addition, funds obtained from other NOAA Line Offices or from Reimbursables are included. See Appendix B for the definitions of Appropriations Categories.

## 4. Report Data Sources, Data Selection Rules and Definitions

The various *The Monthly Variance Reports* use FI MA, HRDS, or other *The Monthly Variance Reports* as their data sources. The following lists the data sources for each of *The Monthly Variance Reports*:

- Labor Costs, Actual vs. Budget Summary
  - FI MA: MASTER, REVTSK, FxxTRN
  - RI MS
  - HRDS
- Non-Labor and PCS Comparison
  - FI MA: MASTER, REVTSK, FxxTRN, FY\_FMC
  - RI MS
- Monthly Labor Projections
  - Labor Costs, Actual vs. Budget Summary Report
- Labor Costs, Actual vs. Budget Object Class Detail
  - FI MA: MASTER, REVTSK, FxxTRN
- Status of Funds
  - Labor Costs, Actual vs. Budget Summary Report
  - Non-Labor and PCS Comparison Report
- Financial Statements NWS
  - Labor Costs, Actual vs. Budget Summary Report
  - Non-Labor and PCS Comparison Report

The FI MA data are pulled from the various FI MA Oracle tables (files). The SQL statements used to pull the data and the data dictionary descriptions (where available) are found in Appendix D:

- MASTER
- FxxTRN
- FY\_FMC

- REVTSK

FIMA reports actuals by Organization Code, Object Class, and Task Code. For these reports, Task Codes are grouped into Pay Responsibilities. Appendix A provides lookup tables to show the Task Codes that make up a Pay Responsibility, and the crosswalk from Task Code to Pay Responsibility. The Financial Statements group Task Codes into Appropriations Categories. Appendix B provides lookup tables to show the Task Codes that make up an Appropriations Category, and the crosswalk from Task Code to an Appropriations Category. *The Monthly Variance Reports* display plans and actuals by Object Classes. Appendix C provides lookup tables to show the Object Classes as they are used on the reports.

8M1B	01- Local Warnings & Forecasts
8M1H	16- Central Forecast Guidance
8M1H10	16- Central Forecast Guidance
8M1H11	16- Central Forecast Guidance
8M1H12	16- Central Forecast Guidance
8M1H15	16- Central Forecast Guidance
8M1H20	16- Central Forecast Guidance
8M1H30	16- Central Forecast Guidance
8M1H40	16- Central Forecast Guidance
8M1H4A	16- Central Forecast Guidance
8M1H70	16- Central Forecast Guidance
8M1HQ6	16- Central Forecast Guidance
8M1J	01- Local Warnings & Forecasts
8M1J10	01- Local Warnings & Forecasts
8M1J11	01- Local Warnings & Forecasts
8M1J12	01- Local Warnings & Forecasts
8M1J13	01- Local Warnings & Forecasts
8M1J14	01- Local Warnings & Forecasts
8M1J15	01- Local Warnings & Forecasts
8M1J16	01- Local Warnings & Forecasts
8M1J17	01- Local Warnings & Forecasts
8M1J18	01- Local Warnings & Forecasts
8M1J1A	01- Local Warnings & Forecasts
8M1J1B	01- Local Warnings & Forecasts
8M1J1C	01- Local Warnings & Forecasts
8M1J1D	01- Local Warnings & Forecasts
8M1J1E	01- Local Warnings & Forecasts
8M1J1F	01- Local Warnings & Forecasts
8M1J1H	01- Local Warnings & Forecasts
8M1J1G	04- NWR Transmitters - Kentucky
8M1J1K	01- Local Warnings & Forecasts

8M1J1M	04- NWR Transmitters - Kentucky
8M1J1N	01- Local Warnings & Forecasts
8M1J1P	05- NWR Transmitters - South Dakota
8M1J1R	06- NWR Transmitters - Illinois
8M1J1T	10- Advanced Weather Prediction Prototype - OU
8M1J1V	07- NWR Transmitters - Wyoming, Sweetwater/Uinta Co.
8M1J1W	09- North Dakota Agricultural Weather Network
8M1J1Z	08- NWR Transmitters - Southern Missouri
8M1J20	01- Local Warnings & Forecasts
8M1J21	01- Local Warnings & Forecasts
8M1J22	01- Local Warnings & Forecasts
8M1J29	01- Local Warnings & Forecasts
8M1J2A	12- Susquehanna River Basin Flood System
8M1J2B	14- Advanced Hydrologic Prediction System
8M1J30	01- Local Warnings & Forecasts
8M1J31	01- Local Warnings & Forecasts
8M1J33	01- Local Warnings & Forecasts
8M1J35	11- Data Buoy & CMAN Continuity
8M1J3C	01- Local Warnings & Forecasts
8M1J40	01- Local Warnings & Forecasts
8M1J50	01- Local Warnings & Forecasts
8M1J60	01- Local Warnings & Forecasts
8M1J70	13- Aviation Forecasts
8M1J80	01- Local Warnings & Forecasts
8M1J81	02- Secretary's Mitigation Sites
8M1J99	01- Local Warnings & Forecasts
8M1JAH	01- Local Warnings & Forecasts
8M1JEC	01- Local Warnings & Forecasts
8M1JFC	01- Local Warnings & Forecasts
8M1JFS	15- WFO Maintenance
8M1JNK	01- Local Warnings & Forecasts
8M1JQ1	01- Local Warnings & Forecasts
8M1JRR	01- Local Warnings & Forecasts

8M1JSB	01- Local Warnings & Forecasts
8M1JSH	01- Local Warnings & Forecasts
8M1JSP	01- Local Warnings & Forecasts
8M1JUT	03- Cooperative Institute - Univ. of Utah - 2002 Olympics
8M1JWR	01- Local Warnings & Forecasts
8M1K	17- Atmospheric & Hydrological Research
8M1K10	17- Atmospheric & Hydrological Research
8M1K20	17- Atmospheric & Hydrological Research

## Object Classes to Reporting Categories Lookup Table

Table of Object Classes used in Monthly FIMA Reports

## Table of Object Classes used in Monthly Reports

Report	Object Class
Non Labor and PCS Comparison:	
Non Labor Portion	21, 22, 23, 24, 25, 26, 31, 32, 41, 42, 43, 95
PCS Portion	12, 21, 22, 25, 43
Labor Cost Actual vs Budget - Object Class Detail:	
FTE	1112, 1113, 1130, 1132, 1133, 1135, 1139,
Salaries	1112, 1113, 1118, 1130, 1132, 1133, 1135, 1139
Benefits	1218, 1219, 1230, 1231, 1232, 1233, 1234, 1235, 1236, 1237, 1238, 1239, 1320, 1321, 1330, 1399
COLA	1213
Overtime	1151
Premium Pay	1152, 1154, 1156, 1157, 1158
Award	1159

SQL STATEMENT TO DOWNLOAD YEAR-TO-DATE FTE-FOP DATA FROM FIMA  
SQL STATEMENT TO DOWNLOAD ANNUAL -FTE- FOP DATA FROM FIMA

Data Dictionary for Master file in FIMA

<b>COLUMN NAME</b>	<b>DATATYPE</b>	<b>DESCRIPTION</b>
<b>MONTH</b>	<b>NUMBER(2)</b>	Month record was last updated.
<b>JULIAN_DATE</b>	<b>NUMBER(7)</b>	Julian date on which record was processed in FIMA. The format is 19YYDDD where YY is the year, DDD is the day of the year.
<b>FINANCIAL_MANAGEMENT_CTR</b>	<b>NUMBER(3)</b>	Financial Management Center code. See FMC table for corresponding FMC titles.
<b>ORGANIZATION_CODE</b>	<b>VARCHAR2(6)</b>	Code representing NOAA Organization elements. Refer to NOAORG table for corresponding Organization titles.
<b>APPROPRIATION</b>	<b>VARCHAR2(1)</b>	NOAA appropriation symbols. Refer to APN table for corresponding titles.
<b>TASK_NUMBER</b>	<b>VARCHAR2(6)</b>	Pre-defined six character code identifying individual NOAA task. Refer to TASK table for information on individual tasks.
<b>SUB_ACTIVITY</b>	<b>VARCHAR2(2)</b>	Code designating specific budget sub-activity transaction applies to.
<b>LINE_ITEM</b>	<b>VARCHAR2(3)</b>	Budget Line Item. Refer to LI table for corresponding LI titles.
<b>PHASE_NUMBER</b>	<b>VARCHAR2(2)</b>	User defined sub-element of TASK that identifies individual phases.
<b>MAJOR_OBJECT_CLASS</b>	<b>NUMBER(2)</b>	First two digits of object class, identifying major object classification.
<b>SUB_OBJECT_CLASS</b>	<b>NUMBER(1)</b>	The third digit, or sub-object class, of the object classification.
<b>MINOR_OBJECT_CLASS</b>	<b>NUMBER(2)</b>	Second two digits of object class, identifying minor object classification.
<b>FISCAL_YEAR</b>	<b>NUMBER(4)</b>	Identifies fiscal year.
<b>GOVT_CODE</b>	<b>VARCHAR2(1)</b>	Government code. Used to indicate status of disburse.
<b>COUNTRY_CODE</b>	<b>VARCHAR2(3)</b>	Three character code identifying country of origin, or in the case of prompt payment or lost discount penalties, used to indicate reason for late payment penalty.
<b>CURRENT_MONTH_HOURS</b>	<b>NUMBER(11,3)</b>	Amount of hours to the nearest tenth.
<b>CURRENT_NOMTH_UNPAID_EXP</b>	<b>NUMBER(13,3)</b>	Amount in dollars and cents of goods and/or services received and/or accrued on estimated basis for which payment has not been made or recorded.
<b>CURRENT_MONTH_PAID_EXP</b>	<b>NUMBER(13,3)</b>	Amount of payments made and recorded

COLUMN NAME	DATATYPE	DESCRIPTION
		for goods and/or services received.
CUMULATIVE_HOURS	NUMBER(11,3)	Amount of hours recorded in the current month to the nearest tenth.
CUMULATIVE_UNPAID_EXP	NUMBER(13,3)	Amount of cumulative unpaid expenses in dollars and cents. This include all cumulative disbursements and receipts.
CUMULATIVE_PAID_EXP	NUMBER(13,3)	Amount of cumulative paid expenses in dollars and cents. This include all cumulative disbursements and receipts.
UNDELIVERED_ORDERS	NUMBER(13,3)	Amount in dollars and cents of goods and/or services ordered but not yet received or paid for.
PRIOR_MONTH_OBLIGATIONS	NUMBER(14,3)	Cumulative FY to date total value of obligations in dollars and cents through the previous month.
FY_CODE	NUMBER(1)	Fiscal Year code. Code 3 indicates current fiscal year. Code 2 indicates prior fiscal year. Code 1 indicates all other years (i.e. prior to prior year).

```

## Data Dictionary for F00TRN File in FIMA

COLUMN NAME	DATATYPE	DESCRIPTION
MSC_TYPE	VARCHAR2(1)	Single character field that when present, indicates type of MSC data. When blank, indicates data processed through FIMA data entry.
TERMINAL_ID	VARCHAR2(2)	Identifies source terminal (ASC) of data entry.
BATCH_IDENTIFICATION	VARCHAR2(7)	Consisting of the elements (terminal code, month, and batch number) that uniquely identifies the batch in which transaction was accepted in the FIMA system.
TRANSACTION_CODE	VARCHAR2(2)	Code identifying action to be taken by this particular accounting transaction.
FISCAL_YEAR	NUMBER(4)	Identifies fiscal year.
FINANCIAL_MANAGEMENT_CENTER	NUMBER(3)	Financial Management Center code. See FMC table for corresponding FMC titles.
ORGANIZATION_CODE	VARCHAR2(6)	Code representing NOAA Organization elements. Refer to NOAORG table for corresponding Organization titles.
APPROPRIATION	VARCHAR2(1)	NOAA appropriation symbols. Refer to APN table for corresponding titles.
TASK_NUMBER	VARCHAR2(6)	Pre-defined six character code identifying individual NOAA task. Refer to TASK table for information on individual tasks.
PHASE_NUMBER	VARCHAR2(2)	User defined sub-element of TASK that identifies individual phases.
MAJOR_OBJECT_CLASS	VARCHAR2(2)	First two digits of object class, identifying major object classification.
TEXT_OBJECT_CLASS	VARCHAR2(4)	Full four character object class field to accomodate text object class data.
MINOR_OBJECT_CLASS	VARCHAR2(2)	Second two digits of object class, identifying minor object classification.
DOCUMENT_TYPE	VARCHAR2(2)	Identifies type of document. Refer to DTYPE table for format and content.
DOCUMENT_NUMBER	VARCHAR2(9)	Unique identification of document within FIMA system. Refer to Finance Handbook for format and content.

COLUMN NAME	DATATYPE	DESCRIPTION
UNDELIVERED_ORDERS	NUMBER(13,2)	Amount in dollars and cents of goods and/or services ordered but not yet received or paid for.
BUDGETARY_ACCTS	NUMBER(13,2)	Dollars and cents value of direct adjustments made to budgetary accounts.
UNPAID_ACCRUED_EXP	NUMBER(13,2)	Amount in dollars and cents of goods and/or services received and/or accrued on estimated basis for which payment has not been made or recorded.
ACCOUNTS_RECEIVABLE	NUMBER(13,2)	Dollars and cents amount owed to NOAA for which payment has not been received or recorded.
PAID_ACCRUED_EXP	NUMBER(13,2)	Amount of payments made and recorded for goods and/or services received.
RECEIPTS	NUMBER(13,2)	Value of amount in dollars and cents of credit or payment of account payable.
SCHEDULE_NUMBER	VARCHAR2(7)	Treasury schedule number of disbursement.
GOVT_CODE	VARCHAR2(1)	Government code. Used to indicate status of disbursee.
SECOND_TYPE	VARCHAR2(2)	Secondary document type.
SECOND_NUMBER	VARCHAR2(9)	Secondary document number, used as a reference.
COUNTRY_CODE	VARCHAR2(3)	Three character code identifying country of origin, or in the case of prompt payment or lost discount penalties, used to indicate reason for late payment penalty.
HOURS	NUMBER(11,2)	Amount of hours to the nearest tenth.
GEN_LED_DR	VARCHAR2(7)	General Ledger account referenced for direct debit.
GEN_LED_CR	VARCHAR2(7)	General Ledger account referenced for direct credit.
TRANS_AMOUNT	VARCHAR2(13)	Amount in dollars and cents of transaction.
JDATE	NUMBER(7)	Julian date on which record was processed in FIMA. The format is 19YYDDD where YY is the year, DDD is the day of the year.
